DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On page 1 of the specification, the second line of paragraph 1, after the term "2002," please insert the following --now United States Patent 6,689,276,--

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. The examiner agrees with the applicant's arguments regarding previous rejections. As such, all previous rejections are withdrawn.
3. The applicant's newly amended independent claims 1, 16, 25 each contain features not taught by the prior art.
4. Claims 1 and 16 now require the solubility control agent to be potassium silicate and requires that the content of potassium silicate be more than 20%.
5. Typically, automatic dishwashing and textile washing composition will contain silicates. However, normally these silicates will be sodium salts. It is unusual to find the use of potassium

Art Unit: 1751

silicate in an effervescent composition. Secondly, the applicant requires a significantly high amount of the potassium silicate. Typically these types of compositions will contain at most 5-10% of a silicate. The use of this high a silicate content is unusual.

6. Finally, these claims specifically require the composition to be a solid containing a gas releasing agent. The combination of each of these features was not found in the prior art of record.

7. Concerning claim 25, the specific step of adding potassium silicate, the use of a mold to form the cured mixture and the curing process were not found in the prior art of record.

Typically such compositions are pressed into a mold via pressure and would not be cured in the mold. Furthermore, the use of potassium silicate in such compositions is unusual. The combination of these features was not found in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory E. Webb whose telephone number is 571-272-1325. The examiner can normally be reached on 9:00-17:30 (m-f).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yogendra Gupta can be reached on 571-272-1316. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
